

Asadullah Shahbaz

Frontend Engineer (React & Typescript)

+92 32280 96 959 asadshzdev@gmail.com linkedin.com/in/-asadullahshahbaz github.com/Asadullah-shz

I am Software Engineer specializing in React 18 and TypeScript, building scalable, high-performance web applications with modular and type-safe architecture. Experienced in REST API integration, performance optimization, and AI-driven automation workflows. Focused on delivering maintainable, production-grade systems that align technical execution with measurable business impact.

Technical Skills

Programming Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3

Backend & Integration: REST APIs, Node.js

Frontend: React.js, React Router, TanStack Query, State Management

Styling: Tailwind CSS, Flexbox, CSS Grid.

Data & Infra: Upstash Redis, Serverless (Vercel)

Automation: n8n Workflow Orchestration

Tools: Git, GitHub, Figma-to-Code

Currently Exploring: Advanced System Architecture & AI-native Interfaces

Languages: English (C1)

Experience

Product Management Intern

Oct 2025 – Jan 2026

Insite.life

London (Remote)

- Evaluated product-market fit and feature prioritization for early-stage SaaS platform.
- Produced technical reports and roadmap documentation for leadership.
- Analyzed user flows and usability patterns to support strategic product decisions.
- Contributed to cross-functional, globally distributed product teams.

Project Key

ScaleForge - Decoupled CRM & Automation Engine

Industrial grade B2B sales orchestration platform for processing and automating outreach at scale.

Architecture Highlights:

- React 18 + TypeScript frontend using the modular Atomic Design design principles.
- Node.js API best optimized for Vercel Edge runtime.
- Upstash - redis zero latency data persistence.
- Centralised n8n orchestration layer for the automated workflow of outreach.
- Global Admin Control Center for Webhook and Credential Management.

Built to solve the "Scale Barrier" -- ii personalised outreach at high volume, while ensuring stringency of data can be maintained.

Education

Bachelor of Science in Computer Science

March 2024 – March 2028

National College of Business Administration & Economics
