SUMMARY

I am Software Engineer specializing in React 18 and TypeScript, building scalable, high-performance web applications with modular and type-safe architecture. Experienced in REST API integration, performance optimization, and AI-driven automation workflows. Focused on delivering maintainable, production-grade systems that align technical execution with measurable business impact.

EXPERIENCE

Front End Development Intern 01/2026 - 03/2026

Developers Hub Corporation

- Completed intensive 6-week internship in modern frontend development.
- Recognized with "Best Award" for exceptional performance and technical contributions.
- Gained hands-on experience in production-grade React 18 + TypeScript workflows.
- Developed a responsive web application using React.js, reducing page load time by 40% and improving user engagement by 25%.

Product Management Intern 10/2025 - Present

InSite. Life

- Evaluated product-market fit and feature prioritization for early-stage SaaS platform.
- Produced technical reports and roadmap documentation for leadership.
- Analyzed user flows and usability patterns to support strategic product decisions.
- Spearheaded the development of a new SaaS product, resulting in a 35% increase in annual recurring revenue within the first year.
- Contributed to cross-functional, globally distributed product teams.

EDUCATION

Computer Science 03/2024 - 03/2028

National College of Business Administration & Economics - Bachelor of Science

SKILLS

Databases	Intermediate	TypeScript, JavaScript (ES6+)	Advanced
Git, GitHub	Advanced	React.js	Expert
Node.js	Basic	State Management	Intermediate
REST APIs	Intermediate	TanStack Query	Intermediate
Tailwindcss	Advanced	React Route	Advanced
AI/LLM Integration	Intermediate	Html	Expert

Projects

Co-Founder/Technical Lead

DayFlow – Multi-Tenant Business Intelligence Bot

04/2026 - Present

A production-grade, multi-tenant business intelligence bot

Architecture Highlights:

- Developed TypeScript-based AI assistant delivering real-time business analytics via WhatsApp to 50+ SMEs.
- Integrated Gemini AI with 3-tier fallback system achieving 99.9% uptime and 40% cost reduction.
- Built modular data provider architecture supporting Google Sheets, Notion, Airtable, and Restapi
- Implemented automated cron jobs for daily briefings and monthly PDF reports with embedded charts.
- Designed session management system with user whitelisting and admin controls for multi-tenancy.
- Optimized response time to <2s using intelligent caching and period-based data aggregation.
- Added voice transcription feature enabling hands-free business queries via audio messages.

Founder || Lead Engineer

ScaleForge - Decoupled CRM & Automation Engine

03/2026 - 04/2026

Industrial grade B2B sales orchestration platform for processing and automating outreach at scale.

Architecture Highlights:

- React 18 + TypeScript frontend using the modular Atomic Design design principles.
- Node.js API best optimized for Vercel Edge runtime.
- Upstash - redis zero latency data persistence.
- Centralised custom-developed orchestration layer for the automated workflow of outreach.
- Global Admin Control Center for Webhook and Credential Management.
- Built to solve the "Scale Barrier" personalised outreach at high volume, while ensuring stringency of data can be maintained.
